

Hi-Res PDF Settings for QuarkXPress 9

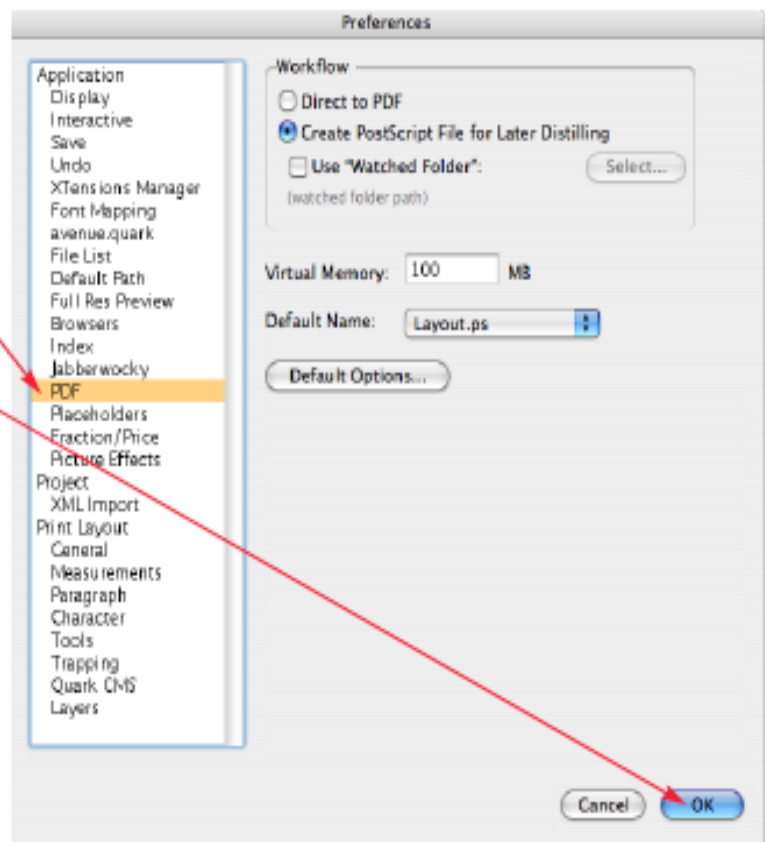

Step 1: Select QuarkXPress from the top Menu.

Select Preferences.

Select the PDF tab in the Preferences window and change settings to match this screen shot.

Click OK.

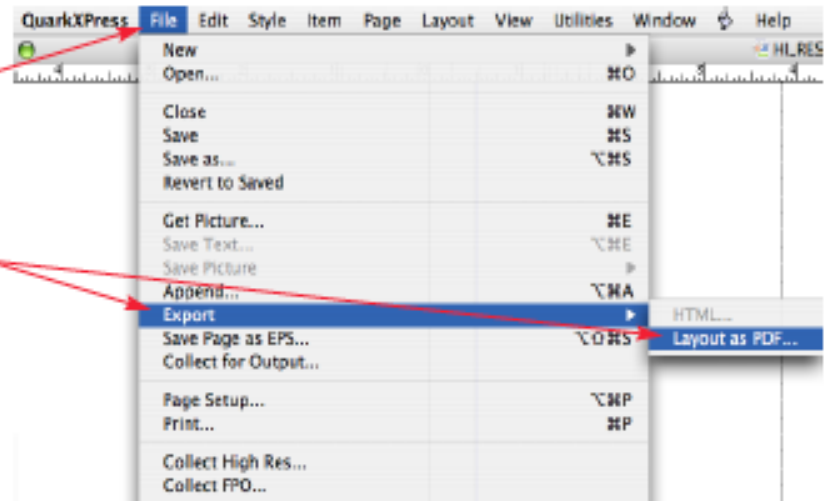

Step 2: Export a Hi-Res Postscript file.

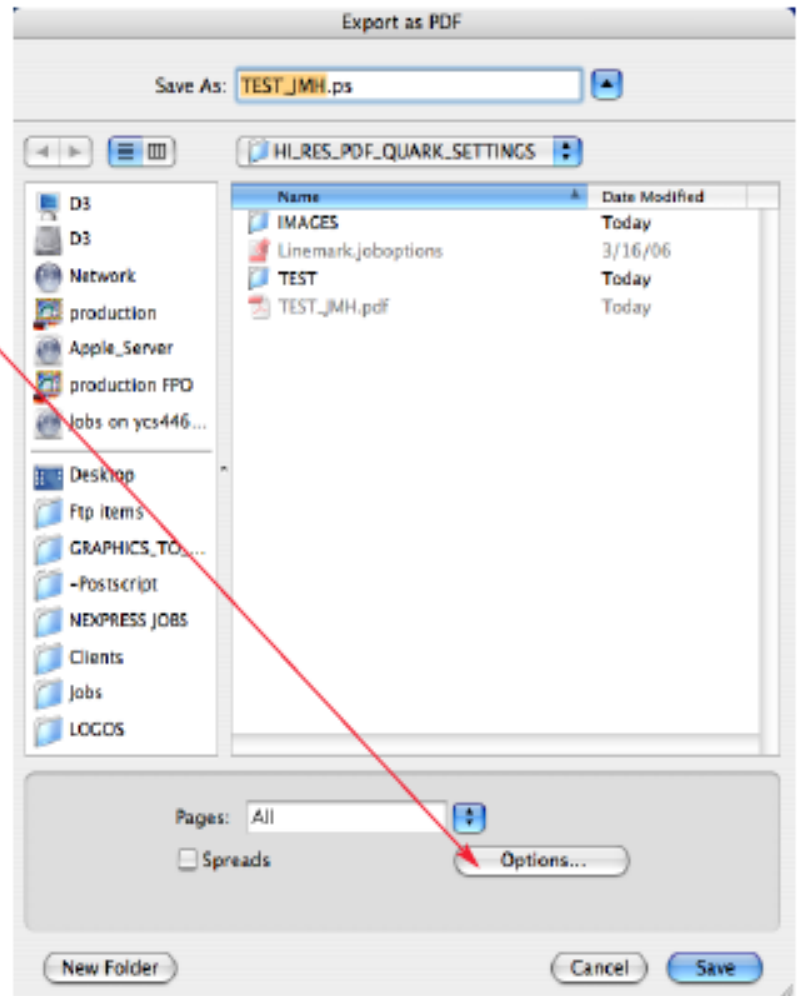

Select File from the top Menu.

Select Export.

Select Layout as PDF....

Click Options....

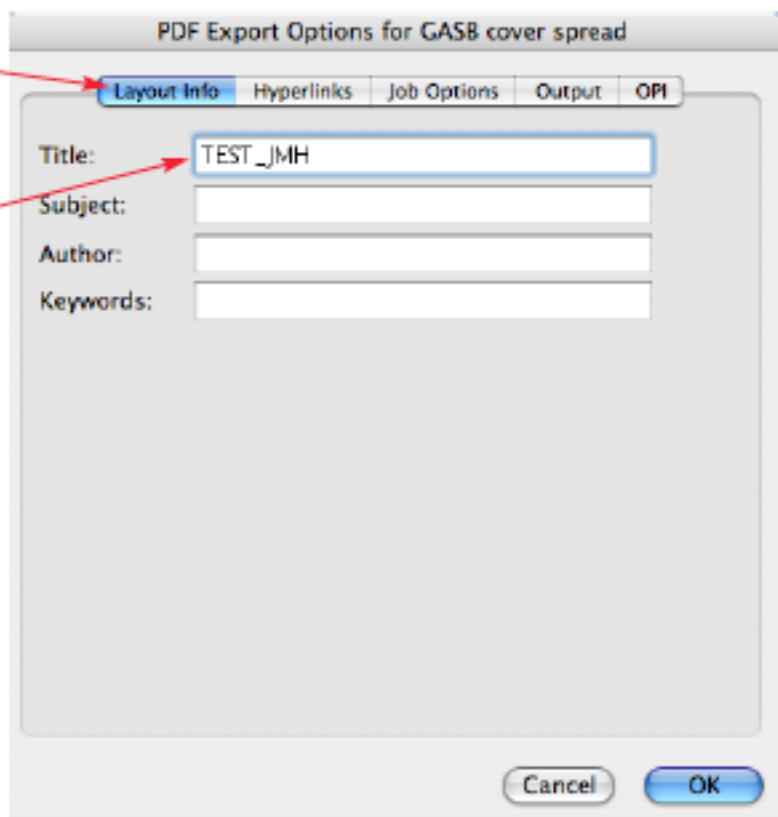

Click through the tabs and change all settings to match this screen shot and the following 3 screen shots (see screen shots 1 through 4).

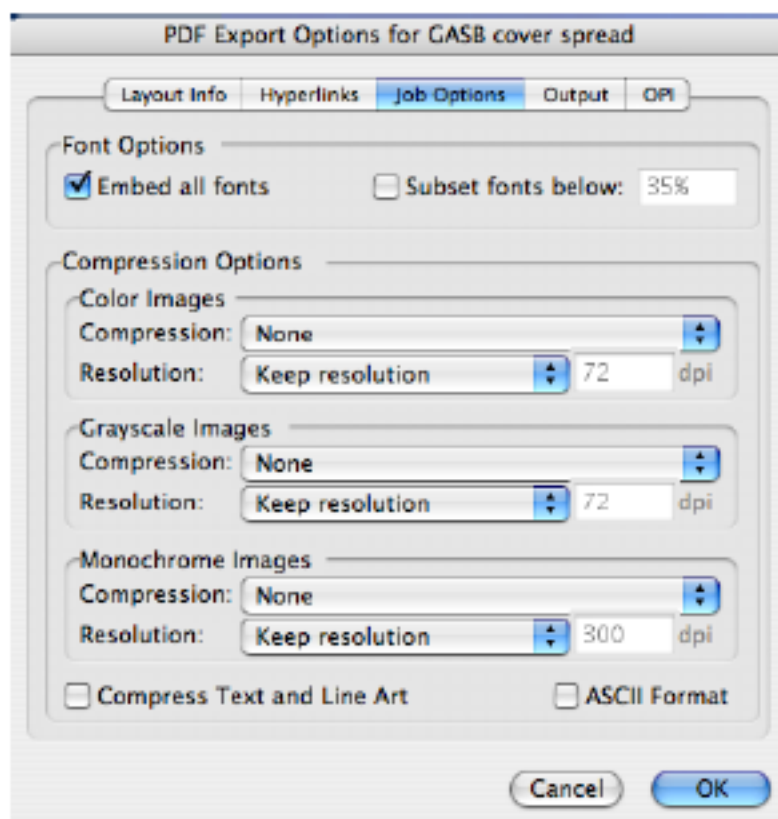

Name accordingly.

The Hyperlink tab is preset and does not need to be changed.

Screen Shot 1 of 4

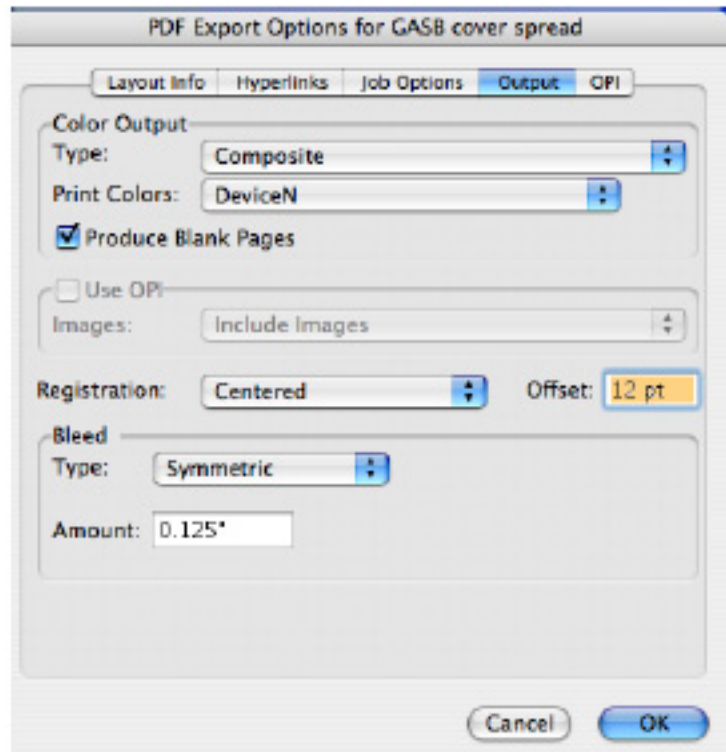

Screen Shot 2 of 4

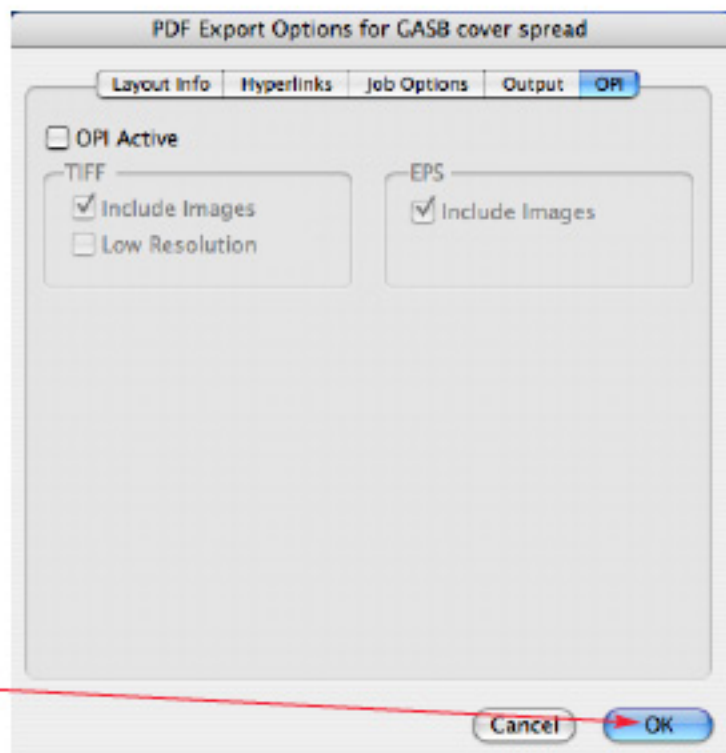

These settings only save for this document. They will need to be reset for each individual document.

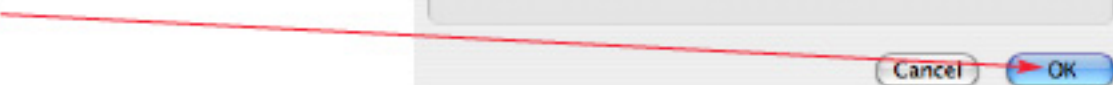

Screen Shot 3 of 4

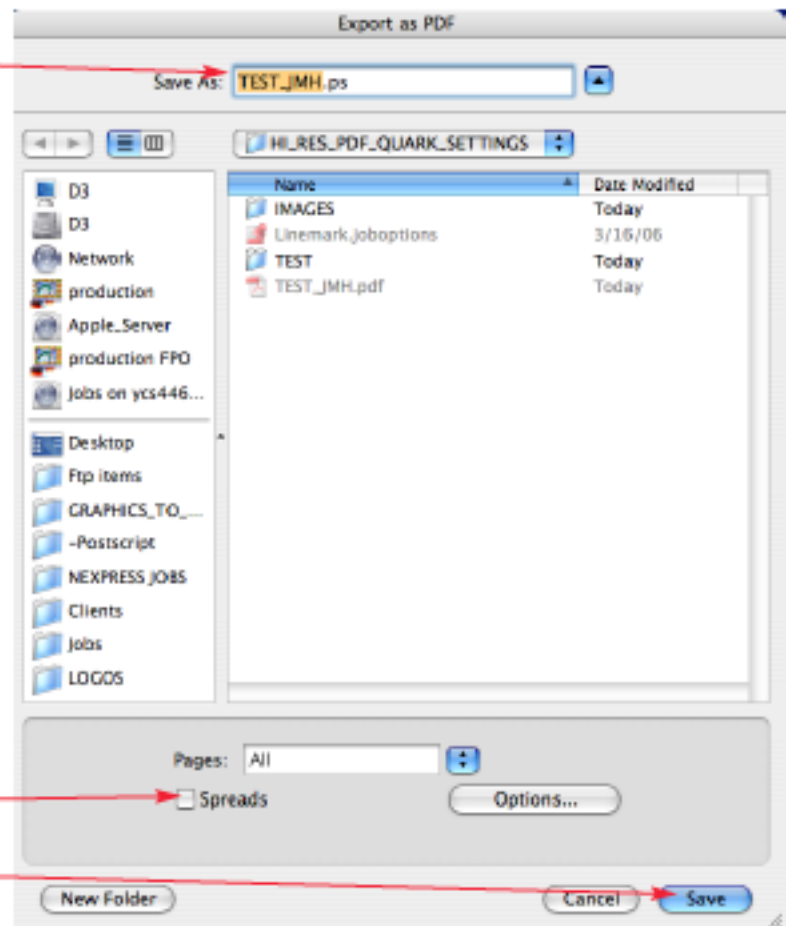

Screen Shot 4 of 4

Click OK.

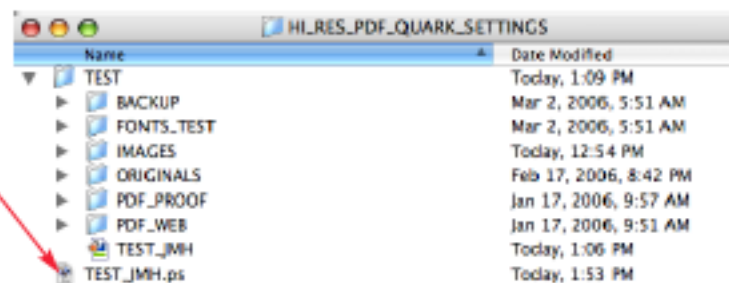

Save file to the appropriate folder and name accordingly.

Click the spread box if the file can be printed as a spread.

Click Save.

You should now have a Postscript file in the folder you specified.

Step 3: Set up Acrobat Distiller with Linemark's settings to distill the Postscript file created in Step 1 and create a Hi-res PDF file.

Copy the Linemark.joboptions file sent in this e-mail onto your computers Hard drive/Library/Application Support/Adobe PDF/Settings.

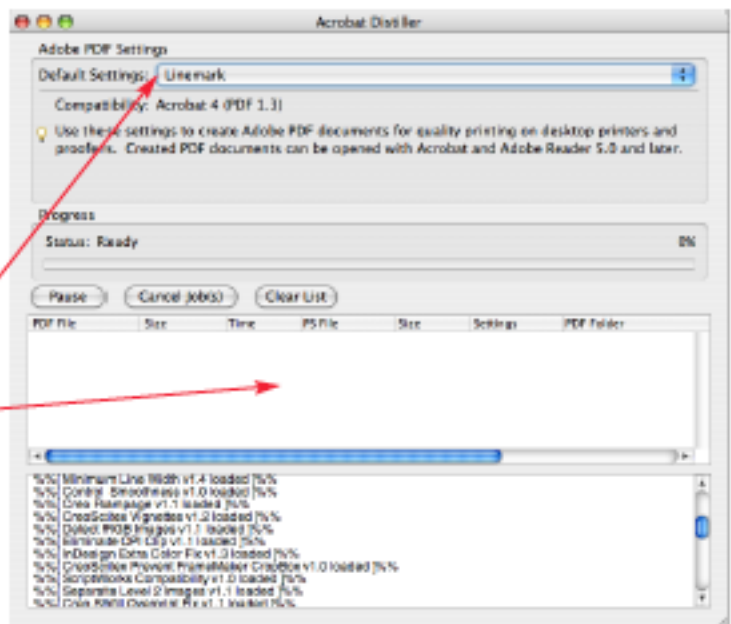

Open Acrobat Distiller.

Acrobat Distiller 7.0.app

Select the Linemark setting in the Default Settings pull down Menu.

Drag your Postscript into this window to distill with the Linemark Settings.

You will find the PDF you created in the folder with the Postscript file.
